

## Aurora House, Glasgow

This contract was completed for HBG and shows very ordinary square columns converted by using GRG circular casings with special capitals to form an interesting feature at an economical cost. We also added the stainless steel skirting detail.

Our company has a long association with HBG which started with the Edinburgh Sheriff Courts in the mid 90's. This contract had a value of 1.4 million pounds. We are delighted this relationship continues into the new century.

The central dome and 8m high column formed an interesting feature for the main reception of this project. The contract value was a little under £100,000.
